

Our School

**KAPOSVÁRI
ANKÁCSY MIHÁLY GIMNÁZIUM**

Our school was named after Mihály Munkácsy

He was born in 1844 in Munkács.

He was a world famous painter.

His most known pictures are:

Yawning apprentice

The sentenced cell

The students celebrate the birthday of the painter every year, they bring flowers to his plaque at the entrance.

The history of our school

- It was founded in 1918 on 8 September.
- At first, it was an all girls school.
- From 1945 until 1946 it also functioned as a hospital.
- In 1963 boys started going to the school and the building got the final design

Our classes

Altogether 833 students go to the high school, there are 27 classes and 8 types of them.

In the Hungarian Parliament

- ▶ Humanities class (with advanced Grammar and Literature education)
- ▶ Class with advanced English education
- ▶ Class with bilingual education (English)
- ▶ 6 year high school
- ▶ Sport-academic class

Poster of a competition about the British culture

Sport show on the anniversary

- Science class with advanced Mathematics and Physics education
- Science class with advanced Biology and Chemistry education
- IT and English class

During an experiment

Traditions

Every year, our ninth graders begin the year with bringing a flower to the statue of the two students.

And when the twelfth graders leave our school, they also leave a flower on the statue.

100 year anniversary

For the 100th anniversary of the high school, we arranged a wonderful celebration and also laid a memorial stone down in the hall.

The youth life in the school

- Every year, the eleventh grade students fight for the title of student principal and a class wins the symbolic key of the school.

At the end of August we welcome the new classes in a camp and at the beginning of September the classes cook together in the school yard.

Every year, there is the Munkácsy-night and the Christmas celebration where our talented students can perform.

The Erasmus projects our school has taken part in

- ▶ Act in Europe: 2014-2016
- ▶ Key to the Future: 2017-2019
- ▶ Geoparks of Europe: 2018-2020

Thank you for the
attention!
